

# REPRESENTACIÓ GRÀFICA D'UNA FUNCIÓ

**Valors:**

$$\begin{aligned}
 X = -2 \quad y &= (-2)^2 - (-2) - 2 = 4 + 2 - 2 = 4 \\
 X = -1 \quad y &= (-1)^2 - (-1) - 2 = 1 + 1 - 2 = 0 \\
 X = 0 \quad y &= (0)^2 - (0) - 2 = 0 + 0 - 2 = -2 \\
 X = 1 \quad y &= (1)^2 - (1) - 2 = 1 - 1 - 2 = -2 \\
 X = 2 \quad y &= (2)^2 - (2) - 2 = 4 - 2 - 2 = 0 \\
 X = 3 \quad y &= (3)^2 - (3) - 2 = 9 - 3 - 2 = 4
 \end{aligned}$$

$$\begin{aligned}
 X = -3 \quad y &= -3 + 2 = -1 \\
 X = -2 \quad y &= -2 + 2 = 0 \\
 X = -1 \quad y &= -1 + 2 = 1 \\
 X = 0 \quad y &= 0 + 2 = 2 \\
 X = 1 \quad y &= 1 + 2 = 3 \\
 X = 2 \quad y &= 2 + 2 = 4 \\
 X = 3 \quad y &= 3 + 2 = 5
 \end{aligned}$$
